

PEN TEST AS A SERVICE

Penetration Testing as a Service

High-velocity, high-impact pen testing at the speed of digital business

Attackers love traditional penetration testing because its long ramp-ups, inflexibility, low-impact results, and remediation delays leave your digital assets exposed.

In contrast, they *hate* Penetration Testing as a Service (PTaaS) on the Bugcrowd Security Knowledge Platform™. We make human-driven penetration tests easy to launch, run, and scale per your precise assets and requirements, delivering compliance assurance along with better results for risk reduction at the speed of digital business. Plus, our SaaS platform's rich Pen Test Dashboard gives you 24/7 access to timelines, analytics, prioritized findings, and test progress.

Key benefits include:

VERSATILITY

Run pen tests for every need and asset type at the testing intensity you desire

IMPACT

Count on pentester talent with the skills and experience needed for best results

SPEED & SCALE

Launch tests within 72 hours and easily repeat them on-demand

TRANSPARENCY

View findings and tester progress through the methodology checklist in real time

INTEGRATION

Flow findings directly into your SDLC process for fast & early remediation

Bugcrowd PTaaS Solutions

Web Application Pen Test (Buy & Set Up Online!)

Test web applications, whether cloud-based or on-premises, of any complexity

Network Pen Test (Buy & Set Up Online!)

Rely on expert network pen testers to find hidden flaws that other approaches can't

Mobile Application Pen Test

Count on excellent results from a curated team of mobile app security experts

Cloud Pen Test

Identify vulnerabilities unique to cloud environments, while respecting shared responsibility

API Pen Test

Test the security of your APIs, with results fully integrated with your SDLC, before they ship

IoT Device Pen Test

Find cyber-physical vulnerabilities unique to connected devices, from pacemakers to planes

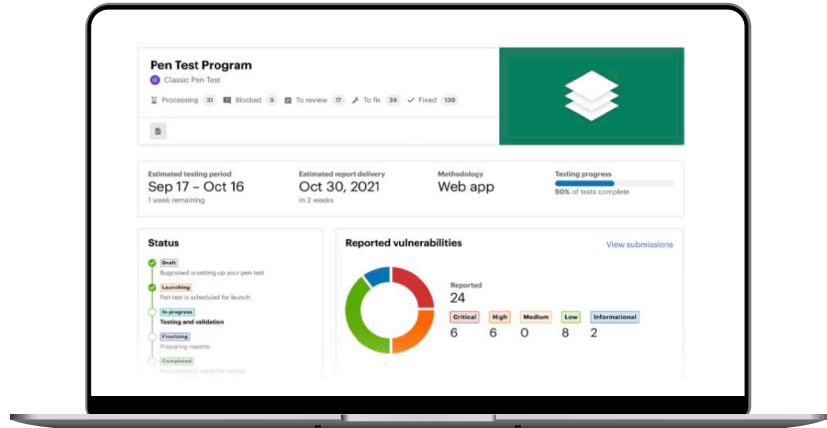

Social Engineering Pen Test

Run a specialized test to assess how your organization responds to common social engineering threats

How It Works

The Bugcrowd Security Knowledge Platform™ makes it easy to configure and launch pen tests for any asset. After building a pentester team per your exact needs, we'll launch your pen test within days and give you 24/7 access to prioritized results, along with test status and progress, in a rich dashboard. When your test is complete, you can download a detailed report for compliance directly inside your dashboard.

Bugcrowd Security Knowledge Platform™

Vulnerability Disclosure
Accept External Feedback

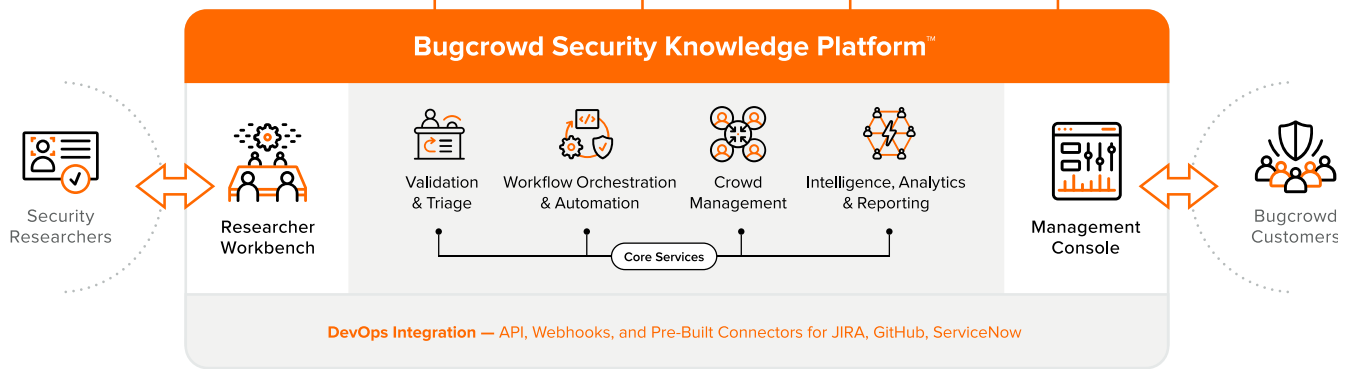

Bug Bounty
Discover More Vulnerabilities

Pen Test as a Service
Go Beyond Compliance

Attack Surface Management
Find and Prioritize Unknown Assets

Right Crowd, Right Time

Need special skills? We match the right trusted hackers to your needs and environment across hundreds of dimensions using AI (CrowdMatch™).

Engineered Triage at Scale

Using an advanced toolbox in our the platform, our global team rapidly validates and triages submissions, with P1s often handled within hours.

Insights From Security Knowledge Graph

We apply knowledge developed over a decade of experience across thousands of customer programs to help you make continuous improvements.

Works With Your Existing Processes

The platform integrates with your existing tools and processes to ensure that applications and APIs are continuously tested before they ship.

Packages and Add-ons

Bugcrowd Pen Testing as a Service (PTaaS) solutions are available in a variety of configurations, and for a variety of assets, for all your compliance and risk reduction needs. Bugcrowd PTaaS tests launch in days—not weeks—and are as scalable and repeatable as you need.
